Index of Authors

Numerals followed by the letter A refer to pages in Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

AGGETT, P. J. Trace element status of the human diet 21–25

ALDERSON, E. M., SCAIFE, J. R. & GALBRAITH, H. The effect of oestradiol-17β and Cimaterol given alone or in combination on lipid metabolism and cAMP concentrations in tissues of male castrate lambs 109A

ALDERSON, ELIZABETH M. *see* GALBRAITH, H. 107A

AMATAYAKUL, K. *see* IMONG, S. M. 147A

ANATHARAMAN-BARR, H. G. *see* DÉCOMBAZ, J. 83A

ANDERSON, A. S. & LEAN, M. E. J. Dietary intakes and weekly expenditures in pregnant diabetic and non-diabetic women 78A

ANDERSON, D. *see* EAYRES, H. 169A

ANIL, M. H. & FORBES, J. M. Lack of effect of intraportal infusions of amino acids and ammonia on food intake in sheep 89A

ANIL, M. H. *see* MBANYA, J. N. 177A

ARIELI, A. & WERNER, D. The use of in vitro fermentation heat to predict energy availability in ruminant feeds 52A

ARMSTRONG, D. G. *see* BUTTERWICK, R. F. 158A

ASH, C. P. J. *see* NORTHROP, C. A. 44A

ASH, S., GRIFFIN, G., HORAN, M. A., LITTLE, R. A., MATHEWS, S. L. B. & ROTHWELL, N. J. Body temperature and metabolic rate following typhoid vaccination in human subjects 139A

ASHFORD, J. *see* DAVIES, H. L. 45A

ASHFORD, J. *see* SINGH, J. 41A

ASHWELL, MARGARET *see* FULLER, N. J. 79A

ASHWELL, MARGARET *see* STIRLING, DOROTHY M. 75A

ASTON, R., HOLDER, A. T., WALLIS, M., BATES, P. C. & BOMFORD, R. Enhancement of growth hormone activity in vivo by monoclonal antibodies: potential for autoimmunization 387–395

AUSTIN, S. *see* ELIA, M. 49A

BAILLIE, A. G. S., MALTIN, CHARLOTTE A. & GARLICK, P. J. The effect of fasting and insulin infusion on muscle protein synthesis in immature and adult rats 114A

BAKKER, N. P. M., ELING, W. M. C., DE GROOT, A., SINKELDAM, E. J. & LUYKEN, R. The influence of quantity and quality of protein on rodent malaria 11A

BANDINI, L. G. *see* SCHOELLER, D. A. 241–246

BANKS, W., CLAPPERTON, J. L., MUIR, D. D. & GIRDLER, ANNE K. The physical properties of butter produced from the milk of Friesian or Jersey cows given diets based on either barley or oats 15A

BARBER, M. C. & DILS, R. R. Inverse relation between DNA synthesis and casein mRNA synthesis in mammary epithelial organoids from mid-pregnant mice 145A

BARBER, M. *see* VERNON, R. G. 100A

BATES, C. J. *see* FULLER, N. J. 81A

BATES, P. C. *see* OMER, ASMA B. 10A

BATES, P. C. *see* OMER, ASMA B. 140A

BATES, P. C. *see* OMWEGA, A. M. 12A

BATES, P. C. *see* OMWEGA, A. M. 183A

BATES, P. C. *see* PELL, J. M. 14A

BAUM, J. D. *see* IMONG, S. M. 147A

BEATON, GEORGE H. Nutrient requirements and population data 63–78

BEATTIE, JOHN Alcohol and the child 121–127

BEERMAN, D. H. *see* HOVELL, F. D. DEB. 13A

BEEVERS, D. G. & MAHESWARAN, R. Does alcohol cause hypertension or pseudo-hypertension? 111–114

BEHRENS, R. *see* ELIA, M. 80A

BELL, A. W. *see* MCBRIDE, B. W. 40A

BIBBY, D., COLEGATE, SALLY & GRIMBLE, R. F. Temperature changes and tissue zinc effects induced by *Escherichia coli* endotoxin in rats fed on maize oil- and coconut oil-enriched diets 69A

BIBBY, D., PHAN, NYUK S. & GRIMBLE, R. F. Inhibition of fever but not tissue protein and zinc responses to *Escherichia coli* endotoxin by pregnancy in rats 42A

BINGHAM, S. A., GOLDBERG, G. R., COWARD, W. A., PRENTICE, A. M., FITZPATRICK, M. & CUMMINGS, J. H. The effect of physical training on basal metabolic rate 62A

BIRCHER, GEMMA M. *see* SHUTLER, SUSAN M. 98A

BLACK, A. E. *see* DAVIES, H. L. 45A

BLACK, A. E. *see* PAUL, A. A. 92A

BLAKEBOROUGH, PETER, NEVILLE, SHEILA G. & ROLLS, BRIAN A. The effect of diets adequate and deficient in calcium on the activities of intestinal plasma membrane ATPases and blood pressure in normotensive and spontaneously hypertensive rats 91A

BRAY, A. J. *see* KEMM, J. R. 4A

BREMNER, I. *see* ROBERTSON, AILEEN 116A

Index of Subjects

Numerals followed by the letter A refer to pages in Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Absorption
Factors influencing the uptake of trace elements from the digestive tract **47**, 161–167, 1988

Accelerometer
Assessment of daily physical activity using synchronous recording of heart rate and body acceleration **47**, 25A, 1988
Estimation of 24 h energy expenditure by a portable accelerometer **47**, 23A, 1988

Acetate
Effect of diet and level of intake on the activities of acetyl-CoA synthetase and acetyl-CoA hydrolase in ovine adipose tissue **47**, 168A, 1988

Acetyl-CoA hydrolase
Effect of diet and level of intake on the activities of acetyl-CoA synthetase and acetyl-CoA hydrolase in ovine adipose tissue **47**, 168A, 1988

Adipose tissue
Measurement of arteriovenous differences across an adipose depot in man **47**, 173A, 1988

β-Adrenergic agonist
Effect of Cimaterol and oestradiol-17β alone or combined on growth and body composition of male castrate lambs **47**, 108A, 1988
Effect of oestradiol-17β and Cimaterol alone or combined on corticosteroid status and other endocrine and body characteristics of male castrate lambs **47**, 107A, 1988
The effect of oestradiol-17β and Cimaterol given alone or in combination on lipid metabolism and cAMP concentrations in tissues of male castrate lambs **47**, 109A, 1988

Alcohol
A tot a day keeps disease away **47**, 129–133, 1988
Alcohol and cardiovascular disease **47**, 99–110, 1988
Alcohol and nutrition **47**, 85–97, 1988
Alcohol and the child **47**, 121–127, 1988
Alcohol: lessons from epidemiology **47**, 79–83, 1988
Alcoholic liver injury **47**, 115–120, 1988
Does alcohol cause hypertension or pseudohypertension? **47**, 111–114, 1988

Alzheimer's disease
Hypercarotenaemia in Alzheimer's disease? **47**, 132A, 1988

Amino acid infusion
Lack of effect of intraportal infusions of amino acids and ammonia on food intake in sheep **47**, 89A, 1988

Amino acids
Effect of intraabomasal infusions of amino acids or of a mixed animal protein source on milk production in the dairy cow **47**, 50A, 1988
Effect of mixed meal ingestion on the exchange of glutamine, alanine and glutathione across human muscle **47**, 49A, 1988
Effect of rumen-protected methionine and lysine on milk production from cows given grass silage diets **47**, 82A, 1988

Ammonia
Uptake of ammonia across the liver of forage-fed cattle **47**, 153A, 1988

Ammonium acetate
The use of ammonium acetate for milk-fat production in high-producing dairy cows **47**, 152A, 1988

Animal production
Diets in transition: human health and animal production. Consequences for agriculture and some possible new approaches **47**, 331–342, 1988

Anti-inflammatory agents
Non-steroidal anti-inflammatory agents and protein turnover in the elderly **47**, 133A, 1988

Athletes
Measurement of body composition in lean athletic women **47**, 112A, 1988
Nutrient intake of six elite woman athletes **47**, 20A, 1988

ATP utilization
Simulation of energy costs associated with protein metabolism in growing lambs **47**, 56A, 1988

Na^+,K^+-ATPase
Estimation of energy expenditure associated with Na^+,K^+-ATPase activity in ovine liver **47**, 118A, 1988
Energy expenditure associated with placental Na^+,K^+-ATPase activity in chronically heat-stressed ewes **47**, 40A, 1988

Autoimmunization
Enhancement of growth hormone activity in vivo by monoclonal antibodies: potential for autoimmunization **47**, 387–395, 1988

Baked beans
Influence of baked beans on plasma lipids in pigs fed on a hypercholesterolaemic diet **47**, 97A, 1988
Influence of baked beans on plasma lipids in normal human volunteers **47**, 98A, 1988

Barley
Substitution of barley and sugar-beet pulp for hay in young and adult wether sheep **47**, 169A, 1988
The manipulation of milk fat composition by including naked oats in a silage-based diet for dairy cows **47**, 96A, 1988
The therapeutic value of barley in the treatment of diabetes mellitus **47**, 178A, 1988

Basal metabolic rate
The effect of physical training on basal metabolic rate **47**, 62A, 1988
Basal metabolism
Influence of underfeeding for 7 d on the physiological response to food ingestion **47**, 16A, 1988
Bicarbonate
The potential use of the labelled bicarbonate method for estimating energy expenditure in man **47**, 247–258, 1988
Bile
Effect of dietary saturated and polyunsaturated fats on the composition of bile in pigs **47**, 99A, 1988
Bioimpedance analysis
Bioimpedance analysis: is it a satisfactory method for assessment of body composition? **47**, 57A, 1988
Blood pressure
The effect of diets adequate and deficient in calcium on the activities of intestinal plasma membrane ATPases and blood pressure in normotensive and spontaneously hypertensive rats **47**, 91A, 1988
Body composition
Bioimpedance analysis: is it a satisfactory method for assessment of body composition? **47**, 57A, 1988
Body composition of healthy Swedish women during pregnancy and lactation **47**, 59A, 1988
Early development changes in 24 h energy expenditure in obese and lean Zucker rats and its relation to body composition **47**, 128A, 1988
Measurement of body composition in lean athletic women **47**, 112A, 1988
Non-invasive methods for assessment of body composition **47**, 375–385, 1988
Bovine somatotrophin
The effect of long-term administration of bovine somatotrophin on plasma hormone and metabolite levels in dairy heifers during their first lactation **47**, 158A, 1988
Boyd Orr Lecture
Nutrient requirements and population data **47**, 63–78, 1988
Bread
Response of rat caecal metabolism to white and wholemeal breads given at two fat levels **47**, 101A, 1988
Breakfast
The effect of habitual breakfast omission on the energy cost of rest, exercise and dietary-induced thermogenesis during consumption of weight-maintenance and low-energy diets **47**, 172A, 1988
Breast-fed babies
Follow up of energy intake and growth of children initially breast-fed **47**, 92A, 1988
Breast feeding
Energy expenditure of 4-month-old breast-fed and formula-fed infants **47**, 37A, 1988
Interactions between breast and supplementary feeding in rural northern Thailand **47**, 147A, 1988
Lipolysis and fat cell size in subcutaneous adipose tissue from women breast-feeding and those artificially feeding their babies **47**, 157A, 1988
Breast milk
Reduced faecal immune protein excretion in breast-fed Gambian infants by 3 months of age **47**, 46A, 1988
Within-day variations in the digestive enzyme activity of breast-milk from five Cambridge mothers **47**, 66A, 1988
British diet
Is the British diet improving? **47**, 295–306, 1988
The nation's diet in context: the future **47**, 343–347, 1988
Brown adipose tissue
Characterization of brown adipose tissue in diabetic SHR/N-*cp* rats **47**, 77A, 1988
Mechanisms of energy exchange in a rat model of endotoxaemia **47**, 71A, 1988
Regulation of the purine nucleotide binding site of brown adipose tissue mitochondrial uncoupling protein **47**, 28A, 1988
The effect of diet restriction on the development of prenatal and postnatal brown adipose tissue thermogenesis in the guinea-pig **47**, 75A, 1988
The effect of lateral hypothalamic lesion on brown adipose tissue activity in the genetically obese (*falfa*) rat **47**, 126A, 1988
Butter
The physical properties of butter produced from the milk of Friesian or Jersey cows given diets based on either barley or oats **47**, 15A, 1988
What the British public spread on bread **47**, 70A, 1988

Caecal metabolism
Response of rat caecal metabolism to white and wholemeal breads given at two fat levels **47**, 101A, 1988
Caffeine
Tolerance to the thermogenic effect of caffeine in active adult rats **47**, 83A, 1988
Calcium
Prevention of calcium-induced enzyme efflux from normal skeletal muscle by vitamin E **47**, 34A, 1988
The effect of diets adequate and deficient in calcium on the activities of intestinal plasma membrane ATPases and blood pressure in normotensive and spontaneously hypertensive rats **47**, 91A, 1988
Calcium flux
Unidirectional calcium and phosphate fluxes across the isolated mucosa from the rumen and omasum of sheep **47**, 143A, 1988
Calcium intake
Validation of a questionnaire as a method of estimating calcium intake **47**, 184A, 1988

Carbohydrate metabolism
Carbohydrate metabolism in muscle and in the whole body of man after mixed meal ingestion **47**, 51A, 1988

Carbohydrates
Effects of food carbohydrates on large intestinal fermentation in vitro **47**, 176A, 1988
Gut transit and carbohydrate uptake **47**, 153–159, 1988
Hormonal and metabolic responses to carbohydrate and guar gum ingestion before endurance exercise **47**, 175A, 1988
The effect of acute ingestion of a carbohydrate-based meal on the maximum running performance of rats **47**, 19A, 1988

Carbon dioxide turnover
Equipment for estimating carbon dioxide turnover rate in undisturbed grazing sheep **47**, 136A, 1988

Cardiovascular disease
Alcohol and cardiovascular disease **47**, 99–110, 1988
General discussion **47**, 11–19, 1988
Introductory remarks **47**, 1, 1988
Nutrition, coronary heart disease and preventive medicine **47**, 269–275, 1988
Should the national diet be altered to prevent coronary disease? **47**, 3–8, 1988

Carotene
Hypercarotenaemia in Alzheimer's disease? **47**, 132A, 1988

Casein mRNA synthesis
Inverse relation between DNA synthesis and casein mRNA synthesis in mammary epithelial organoids from mid-pregnant mice **47**, 145A, 1988

Cheese
The protective effects of cheese against dental caries **47**, 48A, 1988

Chick embryo
Yolk lipid uptake by the chick embryo: an electron microscope study with reference to low hatchability in young parent stock **47**, 161A, 1988

Children
Alcohol and the child **47**, 121–127, 1988

Children's rusks
Dental caries potential of children's rusks **47**, 3A, 1988

Cholesterol
Comparative effect of four different legume species on the plasma lipid levels of hypercholesterolaemic pigs **47**, 124A, 1988
Effects of sugar-beet fibre on glucose tolerance and circulating cholesterol levels **47**, 185A, 1988
Influence of a 3-month programme of brisk walking on walking performance, plasma cholesterol and body fatness in middle-aged women **47**, 174A, 1988
Influence of baked beans on plasma lipids in pigs fed on a hypercholesterolaemic diet **47**, 97A,1988
Influence of baked beans on plasma lipids in normal human volunteers **47**, 98A, 1988

Cholinergic stimulation
The involvement of chloride ions in the hypersecretory response to differing levels of cholinergic stimulation in the starved rat jejunum **47**, 8A, 1988

Chromium
The therapeutic value of barley in the treatment of diabetes mellitus **47**, 178A, 1988

Cimaterol
Effect of Cimaterol and oestradiol-17β alone or combined on growth and body composition of male castrate lambs **47**, 108A, 1988
Effect of oestradiol-17β and Cimaterol alone or combined on corticosteroid status and other endocrine and body characteristics of male castrate lambs **47**, 107A, 1988
The effect of β_2-agonists on the endogenous nitrogen loss of sheep **47**, 13A, 1988
The effect of oestradiol-17β and Cimaterol given alone or in combination on lipid metabolism and cAMP concentrations in tissues of male castrate lambs **47**, 109A, 1988

Clenbuterol
The effect of β_2-agonists on the endogenous nitrogen loss of sheep **47**, 13A, 1988

Colon
Acute and chronic undernutrition and their effects on rat colonic secretion **47**, 164A, 1988
Glucose feeding during starvation and its effects on secretion in the rat ileum and colon **47**, 144A, 1988

Consumer attitudes
Consumer attitudes to liquid milk **47**, 95A, 1988

Copper deficiency
Effects of dietary lactose and copper deficiency in the rat **47**, 36A, 1988

Coronary heart disease
Effects of dietary lactose and copper deficiency in the rat **47**, 36A, 1988

Corticotrophin-releasing factor
Thermogenic effects of corticotrophin-releasing factor in genetically obese Zucker rats **47**, 165A, 1988

Creatine–creatinine interconversions
The implications of creatine–creatinine interconversions in man **47**, 17A, 1988

Cystic fibrosis
Effect of short-term nutritional supplementation on protein turnover during pulmonary disease in cystic fibrosis **47**, 106A, 1988

Dairy products
Changes in the demand and supply for milk and dairy products **47**, 323–329, 1988

Dental caries
Dental caries potential of children's rusks **47**, 3A, 1988
The protective effects of cheese against dental caries **47**, 48A, 1988

Dental health
The dental effects of lactitol replacing sucrose in confectionery examined in a clinical trial **47**, 2A, 1988

Desferrioxamine
Effects of desferrioxamine on the influence of vitamin E deficiency on rodent malaria **47**, 183A, 1988

Diabetes
Characterization of brown adipose tissue in diabetic SHR/N-*cp* rats **47**, 77A, 1988
Dietary intakes and weekly expenditures in pregnant diabetic and non-diabetic women **47**, 78A, 1988
The therapeutic value of barley in the treatment of diabetes mellitus **47**, 178A, 1988
Thyroid involvement in metabolic responses to mild cold is impaired in obese diabetic women **47**, 134A, 1988

Dietary fat
Effect of dietary saturated and polyunsaturated fats on the composition of bile in pigs **47**, 99A, 1988
Response of rat caecal metabolism to white and wholemeal breads given at two fat levels **47**, 101A, 1988
The effect of dietary fats on *N*-nitrosamine formation in man **47**, 21A, 1988

Dietary fibre
Influence of non-digestible polysaccharides on small-bowel cytokinetics and circulating enteroglucagon levels in the rat **47**, 186A, 1988
Physicochemical characteristics of food and the digestion of starch and dietary fibre during gut transit **47**, 143–152, 1988
The digestion of three sources of dietary fibre by growing pigs **47**, 104A, 1988
The use of questionnaires to predict fat and fibre intakes **47**, 4A, 1988

Dietary survey
Is the British diet improving? **47**, 295–306, 1988
The use of questionnaires to predict fat and fibre intakes **47**, 4A, 1988

Diet-induced thermogenesis
Diet-induced thermogenesis may be mediated by tryptophan and serotonin **47**, 79A, 1988
Thermic responses to food in rats with lesions of the ventromedial hypothalamus **47**, 24A, 1988

Digestion
Gut transit and carbohydrate uptake **47**, 153–159, 1988

Digestive enzymes
Within-day variations in the digestive enzyme activity of breast-milk from five Cambridge mothers **47**, 66A, 1988

Digestive tract
Factors influencing the uptake of trace elements from the digestive tract **47**, 161–167, 1988
Glucose feeding during starvation and its effects on secretion in the rat ileum and colon **47**, 144A, 1988

DNA synthesis
Inverse relation between DNA synthesis and casein mRNA synthesis in mammary epithelial organoids from mid-pregnant mice **47**, 145A, 1988

Dopamine
The effects of dopamine at doses of 2–10 μg/kg body-weight per min on metabolic rate in normal man **47**, 60A, 1988

Doubly-labelled leucine
A non-invasive technique for determining muscle protein synthesis **47**, 54A, 1988

Doubly-labelled water method
Analytical considerations in the doubly-labelled water ($^2H_2{}^{18}O$) method **47**, 27A, 1988
Applications of the doubly-labelled-water ($^2H_2{}^{18}O$) method in free-living adults **47**, 259–268, 1988
Appropriate equations of calculation of carbon dioxide production in doubly-labelled water studies **47**, 73A, 1988
Calculation of isotope flux rates in truly free-living subjects **47**, 33A, 1988
Classical respirometry and the doubly-labelled-water ($^2H_2{}^{18}O$) method: appropriate applications of the individual or combined techniques **47**, 219–225, 1988
Doubly-labelled water measurements of energy expenditure in Gambian women during the agricultural season **47**, 41A, 1988
Energy expenditure and physical activity of malnourished Gambian infants **47**, 233–239, 1988
Energy expenditure of elite female athletes measured by the doubly-labelled water method **47**, 35A, 1988
Field validation of the doubly-labelled water method **47**, 31A, 1988
Individual variation in the energy cost of pregnancy. 2. Doubly-labelled water method **47**, 45A, 1988
Non-restrictive methods for measuring energy expenditure **47**, 365–374, 1988
The doubly-labelled-water ($^2H_2{}^{18}O$) method: principles and practice **47**, 209–218, 1988
The effect of exercise on isotope fractionation in elite female athletes **47**, 74A, 1988
Validation of the doubly-labelled water technique at low and high activity levels **47**, 29A, 1988

Electron spin resonance
The use of electron-spin-resonance techniques to detect free-radical formation and tissue damage **47**, 397–405, 1988

Endotoxins
Differential effects of endotoxin on the production of fever, diarrhoea and loss of body-weight in mice **47**, 72A, 1988

Energy availability
The use of in vitro fermentation heat to predict energy availability in ruminant feeds **47**, 52A, 1988

Energy balance
Achieving energy balance in clinical studies **47**, 65A, 1988
Energy balance in women using oral contraceptives **47**, 58A, 1988
Energy expenditure
Analytical considerations in the doubly-labelled water ($^2H_2{}^{18}O$) method **47**, 27A, 1988
Applications of the doubly-labelled-water ($^2H_2{}^{18}O$) method in free-living adults **47**, 259–268, 1988
Assessment of daily physical activity using synchronous recording of heart rate and body acceleration **47**, 25A, 1988
Calculation of isotope flux rates in truly free-living subjects **47**, 33A, 1988
Classical respirometry and the doubly-labelled-water ($^2H_2{}^{18}O$) method: appropriate applications of the individual or combined techniques **47**, 219–225, 1988
Contributions of low energy expenditure and excessive energy intake to the development of fatness during infancy **47**, 63A, 1988
Day-to-day variations in the energy expenditure of rural Gambian women **47**, 39A, 1988
Dependence of energy expenditure on carbohydrate and not on fat intake in post-obese and control women **47**, 137A, 1988
Dietary intakes and weekly expenditures in pregnant diabetic and non-diabetic women **47**, 78A, 1988
Doubly-labelled water measurements of energy expenditure in Gambian women during the agricultural season **47**, 41A, 1988
Early development changes in 24 h energy expenditure in obese and lean Zucker rats and its relation to body composition **47**, 128A, 1988
Energy expenditure and physical activity of malnourished Gambian infants **47**, 233–239, 1988
Energy expenditure associated with placental Na^+,K^+-ATPase activity in chronically heat-stressed ewes **47**, 40A, 1988
Energy expenditure of elite female athletes measured by the doubly-labelled water method **47**, 35A, 1988
Energy expenditure of 4-month-old breast-fed and formula-fed infants **47**, 37A, 1988
Energy expenditure of malnourished children during catch-up growth **47**, 227–231, 1988
Energy requirements of obese children and young adults **47**, 241–246, 1988
Estimation of energy expenditure associated with Na^+,K^+ -ATPase activity in ovine liver **47**, 118A, 1988
Estimation of 24 h energy expenditure by a portable accelerometer **47**, 23A, 1988
Field validation of the doubly-labelled water method **47**, 31A, 1988
Individual variation in the energy cost of pregnancy. 1. 24 h whole-body calorimetry **47**, 43A, 1988
Individual variation in the energy cost of pregnancy. 2. Doubly-labelled water method **47**, 45A, 1988
Metabolic effects of isoenergetic nutrient exchange over 24 h in relation to obesity in women **47**, 67A, 1988
Non-restrictive methods for measuring energy expenditure **47**, 365–374, 1988
Recent progress in studies on energy expenditure: are the new methods providing answers to the old questions? **47**, 195–208, 1988
The doubly-labelled-water ($^2H_2{}^{18}O$) method: principles and practice **47**, 209–218, 1988
The effect of habitual breakfast omission on the energy cost of rest, exercise and dietary-induced thermogenesis during consumption of weight-maintenance and low-energy diets **47**, 172A, 1988
The energy expenditure of large and small eaters **47**, 138A, 1988
The importance of sedentary activity in the 24 h energy budget **47**, 76A, 1988
The potential use of the labelled bicarbonate method for estimating energy expenditure in man **47**, 247–258, 1988
Validation of the doubly-labelled water technique at low and high activity levels **47**, 29A, 1988
Energy intake
Follow up of energy intake and growth of children initially breast-fed **47**, 92A, 1988
Energy supply
Factors affecting fluid and carbohydrate replenishment during exercise in man **47**, 119A, 1988
Enteroglucagon
Influence of non-digestible polysaccharides on small-bowel cytokinetics and circulating enteroglucagon levels in the rat **47**, 186A, 1988
Environmental temperature
Energy expenditure associated with placental Na^+,K^+-ATPase activity in chronically heat-stressed ewes **47**, 40A, 1988
Replacement of movement-induced thermogenesis with cold-defensive posture-induced thermogenesis in rats kept at 21° compared with 28° **47**, 30A, 1988
Temperature, food form and the food intake of broiler chickens **47**, 93A, 1988
Thyroid involvement in metabolic responses to mild cold is impaired in obese diabetic women **47**, 134A, 1988
Epidemiology
Alcohol: lessons from epidemiology **47**, 79–83, 1988
***Escherichia coli* endotoxin**
Effect of combined vitamin E and protein deficiency on the hepatic response of the rat to the *Escherichia coli* endotoxin **47**, 10A, 1988
Inhibition of fever but not tissue protein and zinc responses to *Escherichia coli* endotoxin by pregnancy in rats **47**, 42A, 1988
Mechanisms of energy exchange in a rat model of endotoxaemia **47**, 71A, 1988

Temperature changes and tissue zinc effects induced by *Escherichia coli* endotoxin in rats fed on maize oil- and coconut oil-enriched diets **47**, 69A, 1988
The effect of vitamin E deficiency in rats on the link between muscle glutamine and protein synthesis during the catabolic response to the *Escherichia coli* endotoxin **47**, 140A, 1988

Essential fatty acids
Effects of isomeric fatty acids on essential fatty acid metabolism in the rat **47**, 86A, 1988
Long-term dietary intervention in multiple sclerosis patients: blood cell correlates **47**, 180A, 1988

Ethnic groups
Onset of menstruation in different ethnic groups in the UK **47**, 68A, 1988

Evaluations of feeds
Evaluation of feeds for ration formulation **47**, 135–141, 1988

Exercise
Energy expenditure of elite female athletes measured by the doubly-labelled water method **47**, 35A, 1988
Factors affecting fluid and carbohydrate replenishment during exercise in man **47**, 119A, 1988
Hormonal and metabolic responses to carbohydrate and guar gum ingestion before endurance exercise **47**, 175A, 1988
Influence of a 3-month programme of brisk walking on walking performance, plasma cholesterol and body fatness in middle-aged women **47**, 174A, 1988
Nutrient intake of six elite woman athletes **47**, 20A, 1988
The acute effects of dietary variation on the distribution of high-density lipoprotein subspecies in active and inactive subjects **47**, 120A, 1988
The effect of acute ingestion of a carbohydrate-based meal on the maximum running performance of rats **47**, 19A, 1988
The effect of diet and prolonged walking on fluid homeostasis **47**, 121A, 1988
The effect of exercise on isotope fractionation in elite female athletes **47**, 74A, 1988
The effect of physical training on basal metabolic rate **47**, 62A, 1988
Validation of the doubly-labelled water technique at low and high activity levels **47**, 29A, 1988

Fasting
The effect of fasting and insulin infusion on muscle protein synthesis in immature and adult rats **47**, 114A, 1988

Fat cell size
Lipolysis and fat cell size in subcutaneous adipose tissue from women breast-feeding and those artificially feeding their babies **47**, 157A, 1988

Fat deposition
The maternal fat component in the weight gain of pregnant women **47**, 6A, 1988

Fat intake
The use of questionnaires to predict fat and fibre intakes **47**, 4A, 1988

Fat metabolism
Fat metabolism in human skeletal muscle and in the whole body after ingestion of a mixed meal **47**, 18A, 1988

Fat pad
Food intake and growth of broiler chickens following removal of the abdominal fat pad **47**, 90A, 1988

Fats
Metabolic effects of isoenergetic nutrient exchange over 24 h in relation to obesity in women **47**, 67A, 1988
What the British public spread on bread **47**, 70A, 1988

Fatty acids
Dietary fish oil supplementation modifies rat skeletal muscle fatty acid composition but does not influence the response of muscles to experimental damage **47**, 32A, 1988
Effects of isomeric fatty acids on essential fatty acid metabolism in the rat **47**, 86A, 1988
Measurement of arteriovenous differences across an adipose depot in man **47**, 173A, 1988
Temperature changes and tissue zinc effects induced by *Escherichia coli* endotoxin in rats fed on maize oil- and coconut oil-enriched diets **47**, 69A, 1988

Feeding frequency
Effect of feeding frequency on total (sham-feeding) and unilateral parotid (normal-feeding) saliva production in sheep **47**, 156A, 1988
Effect of feeding level on insulin sensitivity during lactation in the ewe **47**, 150A, 1988

Fermentation heat
The use of in vitro fermentation heat to predict energy availability in ruminant feeds **47**, 52A, 1988

Fever
Differential effects of endotoxin on the production of fever, diarrhoea and loss of body-weight in mice **47**, 72A, 1988
Inhibition of fever but not tissue protein and zinc responses to *Escherichia coli* endotoxin by pregnancy in rats **47**, 42A, 1988

Fish oil
Dietary fish oil supplementation modifies rat skeletal muscle fatty acid composition but does not influence the response of muscles to experimental damage **47**, 32A, 1988

Fluid balance
Factors affecting fluid and carbohydrate replenishment during exercise in man **47**, 119A, 1988
The effect of diet and prolonged walking on fluid homeostasis **47**, 121A, 1988

Folate
Folate–zinc interaction in pregnant and lactating rats, fetuses and pups **47**, 81A, 1988
Food chemistry
Physicochemical characteristics of food and the digestion of starch and dietary fibre during gut transit **47**, 143–152, 1988
Food composition tables
Future developments in the UK food composition tables **47**, 185–190, 1988
Food disposition
Factors controlling the disposition of primary nutrients **47**, 169–176, 1988
Food form
Temperature, food form and the food intake of broiler chickens **47**, 93A, 1988
Food ingestion
Fat metabolism in human skeletal muscle and in the whole body after ingestion of a mixed meal **47**, 18A, 1988
Influence of underfeeding for 7 d on the physiological response to food ingestion **47**, 16A, 1988
Food intake
Contributions of low energy expenditure and excessive energy intake to the development of fatness during infancy **47**, 63A, 1988
Effect of diet and level of intake on the activities of acetyl-CoA synthetase and acetyl-CoA hydrolase in ovine adipose tissue **47**, 168A, 1988
Effects of two levels of dietary protein on food intake and carcass composition of broiler birds given glucose in the drinking water **47**, 88A, 1988
Food intake and growth of broiler chickens following removal of the abdominal fat pad **47**, 90A, 1988
Lack of effect of intraportal infusions of amino acids and ammonia on food intake in sheep **47**, 89A, 1988
Observations on how sodium chloride loading of the rumen depresses food intake in sheep **47**, 155A, 1988
Temperature, food form and the food intake of broiler chickens **47**, 93A, 1988
The effect of diet restriction on the development of prenatal and postnatal brown adipose tissue thermogenesis in the guinea-pig **47**, 75A, 1988
The effect of habitual breakfast omission on the energy cost of rest, exercise and dietary-induced thermogenesis during consumption of weight-maintenance and low-energy diets **47**, 172A, 1988
The effects of restricted food intake on intestinal secretion in the rat small intestine **47**, 127A, 1988
The energy expenditure of large and small eaters **47**, 138A, 1988
Free radicals
The use of electron-spin-resonance techniques to detect free-radical formation and tissue damage **47**, 397–405, 1988
Gambian infants
Reduced faecal immune protein excretion in breast-fed Gambian infants by 3 months of age **47**, 46A, 1988
Gambian women
Day-to-day variations in the energy expenditure of rural Gambian women **47**, 39A, 1988
Doubly-labelled water measurements of energy expenditure in Gambian women during the agricultural season **47**, 41A, 1988
Glucose
Glucose feeding during starvation and its effects on secretion in the rat ileum and colon **47**, 144A, 1988
Glucose drink
Effects of two levels of dietary protein on food intake and carcass composition of broiler birds given glucose in the drinking water **47**, 88A, 1988
Glucose tolerance
Effects of sugar-beet fibre on glucose tolerance and circulating cholesterol levels **47**, 185A, 1988
Glutamine
Effect of short-term starvation on the release of glutamine by human muscle **47**, 179A, 1988
Growth
Energy expenditure of malnourished children during catch-up growth **47**, 227–231, 1988
Follow up of energy intake and growth of children initially breast-fed **47**, 92A, 1988
Food intake and growth of broiler chickens following removal of the abdominal fat pad **47**, 90A, 1988
Growth hormone
Endocrine control of lipogenic enzyme activity in adipose tissue from lactating ewes **47**, 100A, 1988
Enhancement of growth hormone activity in vivo by monoclonal antibodies: potential for auto-immunization **47**, 387–395, 1988
The use of [^{3}H]proline to determine rates of collagen and noncollagen protein synthesis in skeletal muscle of lambs: effects of growth hormone **47**, 14A, 1988
Growth standards
Summarizing growth standards by the LMS method **47**, 61A, 1988
Guar gum
Hormonal and metabolic responses to carbohydrate and guar gum ingestion before endurance exercise **47**, 175A, 1988
Gut transit
Gut transit and carbohydrate uptake **47**, 153–159, 1988
Physicochemical characteristics of food and the digestion of starch and dietary fibre during gut transit **47**, 143–152, 1988

Human health
Changes in the demand and supply for milk and dairy products **47**, 323–329, 1988

Diets in transition: human health and animal production. Consequences for agriculture and some possible new approaches **47**, 331–342, 1988
Meat and meat products: changes in demand and supply **47**, 315–321, 1988
Nutrition, coronary heart disease and preventive medicine **47**, 269–275, 1988

Hypersecretory response
The involvement of chloride ions in the hypersecretory response to differing levels of cholinergic stimulation in the starved rat jejunum **47**, 8A, 1988

Hypertension
Does alcohol cause hypertension or pseudohypertension? **47**, 111–114, 1988

Hypothalamus
The effect of lateral hypothalamic lesion on brown adipose tissue activity in the genetically obese (*fa/fa*) rat **47**, 126A, 1988

Immune proteins
Reduced faecal immune protein excretion in breast-fed Gambian infants by 3 months of age **47**, 46A, 1988

Indirect calorimetry
Classical respirometry and the doubly-labelled-water ($^2H_2{}^{18}O$) method: appropriate applications of the individual or combined techniques **47**, 219–225, 1988

Infant formulas
Energy expenditure of 4-month-old breast-fed and formula-fed infants **47**, 37A, 1988

Insulin
Changes in circulating insulin and in insulin-receptor affinity of erythrocytes in dairy cows around parturition **47**, 151A, 1988
Effect of feeding level on insulin sensitivity during lactation in the ewe **47**, 150A, 1988
Endocrine control of lipogenic enzyme activity in adipose tissue from lactating ewes **47**, 100A, 1988
Inhibition of insulin release by mannoheptulose decreases mammary gland glucose uptake, lipogenesis and phosphofructokinase activity in starved–refed lactating rats **47**, 149A, 1988
The effect of fasting and insulin infusion on muscle protein synthesis in immature and adult rats **47**, 114A, 1988
The effect of long-term administration of bovine somatotrophin on plasma hormone and metabolite levels in dairy heifers during their first lactation **47**, 158A, 1988
The role of insulin resistance in impaired energy expenditure in the LA/N-*cp* (LA-corpulent) rat **47**, 26A, 1988

Intestinal fermentation
Effects of food carbohydrates on large intestinal fermentation in vitro **47**, 176A, 1988

Intestinal permeability
Intestinal permeability in man: effect of total and partial short-term starvation **47**, 80A, 1988

Iron
The effect of riboflavin deficiency on adsorption and distribution of iron **47**, 38A, 1988

Iron deficiency
Effects of iron deficiency on blood metallothionein-I concentrations in rats **47**, 116A, 1988

Jejunal water transport
Jejunal water transport in man: effects of bicarbonate or tartrate **47**, 9A, 1988

Lactation
A possible role for phosphofructokinase in the acute deactivation of lipogenesis in the mammary gland of starved–refed lactating rats given intragastric triacylglycerol **47**, 125A, 1988
Body composition of healthy Swedish women during pregnancy and lactation **47**, 59A, 1988
Changes in circulating insulin and in insulin-receptor affinity of erythrocytes in dairy cows around parturition **47**, 151A, 1988
Effect of feeding level on insulin sensitivity during lactation in the ewe **47**, 150A, 1988
Effect of litter removal and prolactin on lipolysis in parametrial white fat cells of lactating rats **47**, 110A, 1988
Effects of tumour implantation on the onset of lactation in the rat **47**, 148A, 1988
Endocrine control of lipogenic enzyme activity in adipose tissue from lactating ewes **47**, 100A, 1988
Interactions between breast and supplementary feeding in rural northern Thailand **47**, 147A, 1988
Lipolysis and fat cell size in subcutaneous adipose tissue from women breast-feeding and those artificially feeding their babies **47**, 157A, 1988
Responses of dairy cows to variation in plane of nutrition and to source of metabolizable energy **47**, 170A, 1988
The effect of long-term administration of bovine somatotrophin on plasma hormone and metabolite levels in dairy heifers during their first lactation **47**, 158A, 1988
The use of ammonium acetate for milk-fat production in high-producing dairy cows **47**, 152A, 1988
Within-day variations in the digestive enzyme activity of breast-milk from five Cambridge mothers **47**, 66A, 1988
Zinc, copper and manganese in human milk in late lactation **47**, 146A, 1988

Lactitol
The dental effects of lactitol replacing sucrose in confectionery examined in a clinical trial **47**, 2A, 1988

Lactose
Effects of dietary lactose and copper deficiency in the rat **47**, 36A, 1988

Legumes
Comparative effect of four different legume species on the plasma lipid levels of hypercholesterolaemic pigs **47**, 124A, 1988
Leucine
Muscle protein synthesis rate — a reappraisal of control values **47**, 53A, 1988
Lignin
Nutritive value of oat grain: the importance of hull lignin **47**, 167A, 1988
Linoleic acid
Adipose tissue linoleic acid levels in peptic ulcer disease **47**, 130A, 1988
Long-term dietary intervention in multiple sclerosis patients: blood cell correlates **47**, 180A, 1988
Lipid metabolism
Lipid metabolism in farm animals **47**, 287–293, 1988
Lipid metabolism in man **47**, 277–285, 1988
Lipids
Absorption of residual yolk and liver lipid changes in the newly hatched chick **47**, 160A, 1988
Lipid composition and erythrocyte membrane fluidity in magnesium deficiency **47**, 163A, 1988
Lipids as rumen-defaunating agents **47**, 154A, 1988
Lipids, plasma
Comparative effect of four different legume species on the plasma lipid levels of hypercholesterolaemic pigs **47**, 124A, 1988
Influence of baked beans on plasma lipids in pigs fed on a hypercholesterolaemic diet **47**, 97A,1988
Influence of baked beans on plasma lipids in normal human volunteers **47**, 98A, 1988
Lipogenesis
A possible role for phosphofructokinase in the acute deactivation of lipogenesis in the mammary gland of starved–refed lactating rats given intragastric triacylglycerol **47**, 125A, 1988
Lipogenic enzymes
Endocrine control of lipogenic enzyme activity in adipose tissue from lactating ewes **47**, 100A, 1988
Lipolysis
Effect of litter removal and prolactin on lipolysis in parametrial white fat cells of lactating rats **47**, 110A, 1988
Lipoproteins
The acute effects of dietary variation on the distribution of high-density lipoprotein subspecies in active and inactive subjects **47**, 120A, 1988
Litter removal
Effect of litter removal and prolactin on lipolysis in parametrial white fat cells of lactating rats **47**, 110A, 1988
Liver
Absorption of residual yolk and liver lipid changes in the newly hatched chick **47**, 160A, 1988
Alcoholic liver injury **47**, 115–120, 1988
Uptake of ammonia across the liver of forage-fed cattle **47**, 153A, 1988
LMS method
Summarizing growth standards by the LMS method **47**, 61A, 1988
Lunch
The effects of the nutritional composition of lunch on psychomotor performance **47**, 111A, 1988
Magnesium deficiency
Increased fluidity of the erythrocyte membrane in magnesium deficiency **47**, 162A, 1988
Lipid composition and erythrocyte membrane fluidity in magnesium deficiency **47**, 163A, 1988
Magnetic resonance spectroscopy
Metabolic studies using localized magnetic resonance spectroscopy **47**, 349–352, 1988
Malaria, rodent
Effects of desferrioxamine on the influence of vitamin E deficiency on rodent malaria **47**, 183A, 1988
The influence of quantity and quality of protein on rodent malaria **47**, 11A, 1988
Vitamin E deficiency in the rat and the response to malarial infection **47**, 12A, 1988
Malnutrition
Energy expenditure and physical activity of malnourished Gambian infants **47**, 233–239, 1988
Energy expenditure of malnourished children during catch-up growth **47**, 227–231, 1988
Urinary mercapturic acid outputs of severely malnourished children **47**, 7A, 1988
Mammary gland
Inhibition of insulin release by mannoheptulose decreases mammary gland glucose uptake, lipogenesis and phosphofructokinase activity in starved–refed lactating rats **47**, 149A, 1988
Inverse relation between DNA synthesis and casein mRNA synthesis in mammary epithelial organoids from mid-pregnant mice **47**, 145A, 1988
Margarine
What the British public spread on bread **47**, 70A, 1988
Markers
How valid are hospital studies of nutritional balance and metabolism? **47**, 5A, 1988
Measuring metabolic fluxes in organs and tissues with single and multiple tracers **47**, 353–364, 1988
Mathematical model
Mathematical model of protein metabolism in growing lambs **47**, 55A, 1988
Meal ingestion
Carbohydrate metabolism in muscle and in the whole body of man after mixed meal ingestion **47**, 51A, 1988

Effect of mixed meal ingestion on the exchange of glutamine, alanine and glutathione across human muscle **47**, 49A, 1988

Meat
Meat and meat products: changes in demand and supply **47**, 315–321, 1988

Medical students
Dietary intake of medical students at the Chinese University of Hong Kong **47**, 117A, 1988

Membrane fluidity
Increased fluidity of the erythrocyte membrane in magnesium deficiency **47**, 162A, 1988
Lipid composition and erythrocyte membrane fluidity in magnesium deficiency **47**, 163A, 1988

Menstruation
Onset of menstruation in different ethnic groups in the UK **47**, 68A, 1988

Mercapturic acid
Urinary mercapturic acid outputs of severely malnourished children **47**, 7A, 1988

Metabolic rate
Body temperature and metabolic rate following typhoid vaccination in human subjects **47**, 139A, 1988
The effects of dopamine at doses of 2–10 μg/kg body-weight per min on metabolic rate in normal man **47**, 60A, 1988

Metabolic regulation
Enhancement of growth hormone activity in vivo by monoclonal antibodies: potential for autoimmunization **47**, 387–395, 1988
Measuring metabolic fluxes in organs and tissues with single and multiple tracers **47**, 353–364, 1988
Metabolic studies using localized magnetic resonance spectroscopy **47**, 349–352, 1988

Metallothionein-I
Effects of iron deficiency on blood metallothionein-I concentrations in rats **47**, 116A, 1988

Milk
Changes in the demand and supply for milk and dairy products **47**, 323–329, 1988
Consumer attitudes to liquid milk **47**, 95A, 1988
Responses of dairy cows to variation in plane of nutrition and to source of metabolizable energy **47**, 170A, 1988

Milk fat
The manipulation of milk fat composition by including naked oats in a silage-based diet for dairy cows **47**, 96A, 1988
The use of ammonium acetate for milk-fat production in high-producing dairy cows **47**, 152A, 1988

Milk production
Effect of intraabomasal infusions of amino acids or of a mixed animal protein source on milk production in the dairy cow **47**, 50A, 1988
Effect of rumen-protected methionine and lysine on milk production from cows given grass silage diets **47**, 82A, 1988

Milk quality
The physical properties of butter produced from the milk of Friesian or Jersey cows given diets based on either barley or oats **47**, 15A, 1988

Mineral metabolism
The use of stable isotopes in studies of mineral metabolism **47**, 407–416, 1988

Mitochondrial uncoupling protein
Regulation of the purine nucleotide binding site of brown adipose tissue mitochondrial uncoupling protein **47**, 28A, 1988

Multiple sclerosis
Long-term dietary intervention in multiple sclerosis patients: blood cell correlates **47**, 180A, 1988

Muscle
Effect of mixed meal ingestion on the exchange of glutamine, alanine and glutathione across human muscle **47**, 49A, 1988
Effect of short-term starvation on the release of glutamine by human muscle **47**, 179A, 1988

Muscle damage
Dietary fish oil supplementation modifies rat skeletal muscle fatty acid composition but does not influence the response of muscles to experimental damage **47**, 32A, 1988
Prevention of calcium-induced enzyme efflux from normal skeletal muscle by vitamin E **47**, 34A, 1988

Muscle function
Human skeletal muscle function following acute starvation **47**, 47A, 1988

National diet
General discussion **47**, 11–19, 1988
Introductory remarks **47**, 1, 1988
Should the national diet be altered to prevent coronary disease? **47**, 3–8, 1988

Neutron activation analysis
Non-invasive methods for assessment of body composition **47**, 375–385, 1988

Nitrogen metabolism
The effect of β_2-agonists on the endogenous nitrogen loss of sheep **47**, 13A, 1988

***N*-Nitrosamines**
The effect of dietary fats on *N*-nitrosamine formation in man **47**, 21A, 1988

NMR imaging
Non-invasive methods for assessment of body composition **47**, 375–385, 1988

Norwegian diet
Patterns of dietary change: the Scandinavian experience **47**, 307–314, 1988

Nutrient intake
Dietary intake of medical students at the Chinese University of Hong Kong **47**, 117A, 1988
Nutrient intake of six elite woman athletes **47**, 20A, 1988

Nutrient requirements
Nutrient requirements and population data **47**, 63–78, 1988

Nutrient utilization
Factors controlling the disposition of primary nutrients **47**, 169–176, 1988

Nutrient utilization patterns in lean and obese subjects **47**, 115A, 1988

Nutritional balance studies
How valid are hospital studies of nutritional balance and metabolism? **47**, 5A, 1988

Nutritional risk score
The use of nutritional risk score in identifying patients who may benefit from sip-feed supplementation in hospital **47**, 135A, 1988

Nutritional status
The implications of creatine–creatinine interconversions in man **47**, 17A, 1988

Nutritional supplementation
Effect of short-term nutritional supplementation on protein turnover during pulmonary disease in cystic fibrosis **47**, 106A, 1988
The use of nutritional risk score in identifying patients who may benefit from sip-feed supplementation in hospital **47**, 135A, 1988

Nutrition policy
Patterns of dietary change: the Scandinavian experience **47**, 307–314, 1988

Oat grain
Nutritive value of oat grain: the importance of hull lignin **47**, 167A, 1988

Oats
The manipulation of milk fat composition by including naked oats in a silage-based diet for dairy cows **47**, 96A, 1988

Obesity
Characterization of brown adipose tissue in diabetic SHR/N-*cp* rats **47**, 77A, 1988
Contributions of low energy expenditure and excessive energy intake to the development of fatness during infancy **47**, 63A, 1988
Dependence of energy expenditure on carbohydrate and not on fat intake in post-obese and control women **47**, 137A, 1988
Early development changes in 24 h energy expenditure in obese and lean Zucker rats and its relation to body composition **47**, 128A, 1988
Energy requirements of obese children and young adults **47**, 241–246, 1988
Metabolic effects of isoenergetic nutrient exchange over 24 h in relation to obesity in women **47**, 67A, 1988
Nutrient utilization patterns in lean and obese subjects **47**, 115A, 1988
The effect of lateral hypothalamic lesion on brown adipose tissue activity in the genetically obese (*fa/fa*) rat **47**, 126A, 1988
The role of insulin resistance in impaired energy expenditure in the LA/N-*cp* (LA-corpulent) rat **47**, 26A, 1988
Thermogenic effects of corticotrophin-releasing factor in genetically obese Zucker rats **47**, 165A, 1988
Thyroid involvement in metabolic responses to mild cold is impaired in obese diabetic women **47**, 134A, 1988

Obituary notice
Obituary notice, T. G. Taylor (1919–1987) **47**, 191–193, 1988

Oedema
Hypoalbuminaemia and oedema in protein-deficient rats infected with *Nippostrongylus brasiliensis* **47**, 44A, 1988

Oestradiol-17β
Effect of Cimaterol and oestradiol-17β alone or combined on growth and body composition of male castrate lambs **47**, 108A, 1988
Effect of oestradiol-17β and Cimaterol alone or combined on corticosteroid status and other endocrine and body characteristics of male castrate lambs **47**, 107A, 1988
The effect of oestradiol-17β and Cimaterol given alone or in combination on lipid metabolism and cAMP concentrations in tissues of male castrate lambs **47**, 109A, 1988

Old age
Non-steroidal anti-inflammatory agents and protein turnover in the elderly **47**, 133A, 1988

Oral contraceptives
Energy balance in women using oral contraceptives **47**, 58A, 1988

Parasitic infection
Hypoalbuminaemia and oedema in protein-deficient rats infected with *Nippostrongylus brasiliensis* **47**, 44A, 1988

Parenteral nutrition
The very-low-birth-weight infant on total parenteral nutrition: effect of time of introduction of amino acids on nitrogen balance, growth and hormonal status **47**, 131A, 1988

Peptic ulcer
Adipose tissue linoleic acid levels in peptic ulcer disease **47**, 130A, 1988

Phenylalanine transport
Transport inhibition: an alternative dietary treatment for phenylketonuria? **47**, 87A, 1988

Phenylketonuria
Transport inhibition: an alternative dietary treatment for phenylketonuria? **47**, 87A, 1988

Phosphate flux
Unidirectional calcium and phosphate fluxes across the isolated mucosa from the rumen and omasum of sheep **47**, 143A, 1988

Polyester bag technique
The effect of basal diet on rumen protein degradability measurements derived using an *in situ* polyester bag technique **47**, 94A, 1988

Polyunsaturated fatty acids
Assessment of vitamin E, selenium and polyunsaturated fatty acid interactions in the aetiology of disease in the bovine **47**, 177–184, 1988
Effect of dietary saturated and polyunsaturated fats on the composition of bile in pigs **47**, 99A, 1988

Pregnancy
Alcohol and the child **47**, 121–127, 1988

Body composition of healthy Swedish women during pregnancy and lactation **47**, 59A, 1988
Dietary intakes and weekly expenditures in pregnant diabetic and non-diabetic women **47**, 78A, 1988
Folate–zinc interaction in pregnant and lactating rats, fetuses and pups **47**, 81A, 1988
Individual variation in the energy cost of pregnancy. 1. 24 h whole-body calorimetry **47**, 43A, 1988
Individual variation in the energy cost of pregnancy. 2. Doubly-labelled water method **47**, 45A, 1988
Inhibition of fever but not tissue protein and zinc responses to *Escherichia coli* endotoxin by pregnancy in rats **47**, 42A, 1988
The maternal fat component in the weight gain of pregnant women **47**, 6A, 1988
The metabolism of tryptophan during pregnancy **47**, 123A, 1988
Trace element needs in human pregnancy **47**, 45–53, 1988

Preventive medicine
Nutrition, coronary heart disease and preventive medicine **47**, 269–275, 1988

Protein deficiency
Effect of combined vitamin E and protein deficiency on the hepatic response of the rat to the *Escherichia coli* endotoxin **47**, 10A, 1988
Hypoalbuminaemia and oedema in protein-deficient rats infected with *Nippostrongylus brasiliensis* **47**, 44A, 1988

Protein degradability
The effect of basal diet on rumen protein degradability measurements derived using an *in situ* polyester bag technique **47**, 94A, 1988

Protein metabolism
Mathematical model of protein metabolism in growing lambs **47**, 55A, 1988
Simulation of energy costs associated with protein metabolism in growing lambs **47**, 56A, 1988

Protein quality
The influence of quantity and quality of protein on rodent malaria **47**, 11A, 1988

Protein synthesis
A non-invasive technique for determining muscle protein synthesis **47**, 54A, 1988
Muscle protein synthesis rate — a reappraisal of control values **47**, 53A, 1988
The effect of fasting and insulin infusion on muscle protein synthesis in immature and adult rats **47**, 114A, 1988
The effect of vitamin E deficiency in rats on the link between muscle glutamine and protein synthesis during the catabolic response to the *Escherichia coli* endotoxin **47**, 140A, 1988
The use of [^{3}H]proline to determine rates of collagen and noncollagen protein synthesis in skeletal muscle of lambs: effects of growth hormone **47**, 14A, 1988

Protein turnover
Duration of tracer infusion affects estimates of whole body protein turnover **47**, 113A, 1988
Effect of short-term nutritional supplementation on protein turnover during pulmonary disease in cystic fibrosis **47**, 106A, 1988
Non-steroidal anti-inflammatory agents and protein turnover in the elderly **47**, 133A, 1988

Psychomotor performance
The effects of the nutritional composition of lunch on psychomotor performance **47**, 111A, 1988

Questionnaires
The use of questionnaires to predict fat and fibre intakes **47**, 4A, 1988
Validation of a questionnaire as a method of estimating calcium intake **47**, 184A, 1988

Riboflavin deficiency
The effect of riboflavin deficiency on adsorption and distribution of iron **47**, 38A, 1988

Rumen
Unidirectional calcium and phosphate fluxes across the isolated mucosa from the rumen and omasum of sheep **47**, 143A, 1988

Rumen-defaunating agents
Lipids as rumen-defaunating agents **47**, 154A, 1988

Rumen protein
The effect of basal diet on rumen protein degradability measurements derived using an *in situ* polyester bag technique **47**, 94A, 1988

Saliva production
Effect of feeding frequency on total (sham-feeding) and unilateral parotid (normal-feeding) saliva production in sheep **47**, 156A, 1988

Selenium
Assessment of vitamin E, selenium and polyunsaturated fatty acid interactions in the aetiology of disease in the bovine **47**, 177–184, 1988
Selenophilia **47**, 55–62, 1988

Selenophilia
Selenophilia **47**, 55–62, 1988

Serotonin
Diet-induced thermogenesis may be mediated by tryptophan and serotonin **47**, 79A, 1988

Silage intake
Effects of intraruminal infusions of sodium acetate on silage intake by dairy cows **47**, 177A, 1988

Sip-feed supplements
The use of nutritional risk score in identifying patients who may benefit from sip-feed supplementation in hospital **47**, 135A, 1988

Skinfold thickness
The effect of practice on the measurements of skinfold thickness by an inexperienced observer **47**, 142A, 1988

Small intestine
The effects of restricted food intake on intestinal secretion in the rat small intestine **47**, 127A, 1988

Sodium acetate
Effects of intraruminal infusions of sodium acetate on silage intake by dairy cows **47**, 177A, 1988
Sodium chloride
Observations on how sodium chloride loading of the rumen depresses food intake in sheep **47**, 155A, 1988
Stable isotope
The use of stable isotopes in studies of mineral metabolism **47**, 407–416, 1988
Starch digestion
New concepts in starch digestion in man **47**, 64A, 1988
Physicochemical characteristics of food and the digestion of starch and dietary fibre during gut transit **47**, 143–152, 1988
Starvation
Glucose feeding during starvation and its effects on secretion in the rat ileum and colon **47**, 144A, 1988
Human skeletal muscle function following acute starvation **47**, 47A, 1988
Inhibition of insulin release by mannoheptulose decreases mammary gland glucose uptake, lipogenesis and phosphofructokinase activity in starved–refed lactating rats **47**, 149A, 1988
Intestinal permeability in man: effect of total and partial short-term starvation **47**, 80A, 1988
Sugar-beet
Dried molassed and plain sugar-beet pulp in diets for growing pigs **47**, 102A, 1988
Effects of sugar-beet fibre on glucose tolerance and circulating cholesterol levels **47**, 185A, 1988
Responses of dairy cows to variation in plane of nutrition and to source of metabolizable energy **47**, 170A, 1988
Substitution of barley and sugar-beet pulp for hay in young and adult wether sheep **47**, 169A, 1988
The digestibility of growing-pig diets containing dried molassed or plain sugar-beet pulp **47**, 103A, 1988

Thermogenesis
Acute thermogenic responses to intramuscular typhoid vaccination in man **47**, 166A, 1988
Regulation of the purine nucleotide binding site of brown adipose tissue mitochondrial uncoupling protein **47**, 28A, 1988
Replacement of movement-induced thermogenesis with cold-defensive posture-induced thermogenesis in rats kept at 21° compared with 28° **47**, 30A, 1988
The effect of diet restriction on the development of prenatal and postnatal brown adipose tissue thermogenesis in the guinea-pig **47**, 75A, 1988
The role of insulin resistance in impaired energy expenditure in the LA/N-*cp* (LA-corpulent) rat **47**, 26A, 1988
Thermogenic effects of corticotrophin-releasing factor in genetically obese Zucker rats **47**, 165A, 1988
Tolerance to the thermogenic effect of caffeine in active adult rats **47**, 83A, 1988
Thyroid hormones
Thyroid involvement in metabolic responses to mild cold is impaired in obese diabetic women **47**, 134A, 1988
Toxins
Urinary mercapturic acid outputs of severely malnourished children **47**, 7A, 1988
Trace elements
Assessing the trace element status of man **47**, 37–44, 1988
Factors influencing the uptake of trace elements from the digestive tract **47**, 161–167, 1988
Selenophilia **47**, 55–62, 1988
Trace element availability from the human diet **47**, 27–35, 1988
Trace element needs in human pregnancy **47**, 45–53, 1988
Trace element status of the human diet **47**, 21–25, 1988
Zinc, copper and manganese in human milk in late lactation **47**, 146A, 1988
Tryptophan
Diet-induced thermogenesis may be mediated by tryptophan and serotonin **47**, 79A, 1988
The metabolism of tryptophan during pregnancy **47**, 123A, 1988
Tumour implantation
Effects of tumour implantation on the onset of lactation in the rat **47**, 148A, 1988
Typhoid vaccination
Acute thermogenic responses to intramuscular typhoid vaccination in man **47**, 166A, 1988
Body temperature and metabolic rate following typhoid vaccination in human subjects **47**, 139A, 1988

Undernutrition
Acute and chronic undernutrition and their effects on rat colonic secretion **47**, 164A, 1988
Influence of underfeeding for 7 d on the physiological response to food ingestion **47**, 16A, 1988

Vegetarianism
A study of vegetarianism in female undergraduates at the University of East Anglia **47**, 129A, 1988
Ventromedial hypothalamus
Thermic responses to food in rats with lesions of the ventromedial hypothalamus **47**, 24A, 1988
Very-low-birth-weight infant
The very-low-birth-weight infant on total parenteral nutrition: effect of time of introduction of amino acids on nitrogen balance, growth and hormonal status **47**, 131A, 1988

Vitamin A
Do higher vitamin A requirements in men explain the difference between the sexes in plasma provitamin A carotenoids and retinol? **47**, 181A, 1988
Placebo effects explained by a sex difference in vitamin A requirements and changes in plasma retinol in adults **47**, 182A, 1988

Vitamin E
Assessment of vitamin E, selenium and polyunsaturated fatty acid interactions in the aetiology of disease in the bovine **47**, 177–184, 1988
Effect of combined vitamin E and protein deficiency on the hepatic response of the rat to the *Escherichia coli* endotoxin **47**, 10A, 1988
Effects of desferrioxamine on the influence of vitamin E deficiency on rodent malaria **47**, 183A, 1988
Prevention of calcium-induced enzyme efflux from normal skeletal muscle by vitamin E **47**, 34A, 1988
The effect of vitamin E deficiency in rats on the link between muscle glutamine and protein synthesis during the catabolic response to the *Escherichia coli* endotoxin **47**, 140A, 1988
Vitamin E deficiency in the rat and the response to malarial infection **47**, 12A, 1988

Volatile fatty acids
Effects of food carbohydrates on large intestinal fermentation in vitro **47**, 176A, 1988

Whole-body calorimetry
Individual variation in the energy cost of pregnancy. 1. 24 h whole-body calorimetry **47**, 43A, 1988

Yolk lipids
Absorption of residual yolk and liver lipid changes in the newly hatched chick **47**, 160A, 1988
Yolk lipid uptake by the chick embryo: an electron microscope study with reference to low hatchability in young parent stock **47**, 161A, 1988

Zinc
Folate–zinc interaction in pregnant and lactating rats, fetuses and pups **47**, 81A, 1988
Temperature changes and tissue zinc effects induced by *Escherichia coli* endotoxin in rats fed on maize oil- and coconut oil-enriched diets **47**, 69A, 1988
